MARKUS*

POTENTIAL FOR 130000 EURO A YEAR

Implemented: none yet (planning phase)
Pending: all three revenue plays

Marcus (1 M monthly Spotify listeners, 300 k YT subs) lives off streaming but wants a comeback EP.
Our heat-map found memberships, vinyl repress and micro-sync worth **€130 k** annual upside.
He loved the plan but needs cash and head-space to execute—still touring part-time as a DJ.
Status 60 days post-sprint: Patreon tier mock-ups ready; vinyl quote secured; sync library pitched—but implementation paused while he raises production funds.

EXECUTIVE SNAPSHOT

- **Who & where:** Marcus — 34-year-old hip-hop artist, Western Europe; **1 M monthly Spotify listeners**, 300 k YouTube subs.
- **Starting pain:** Lives off catalogue streams; zero direct to consumer, no fan-club, sync requests ad-hoc.
- **Sprint goal:** size untapped revenue, hand him a capital-light action plan he can fund later.
- **Headline finding: €130 k annual upside** identified across memberships, vinyl repress & micro-sync.
- **Implementation status:** planning stage — no cash spent yet; roadmap secured funding quotes.

BASELINE HEALTH-CHECK

- **Revenue mix:** Streaming 96 % (€160 k/yr) • Live 4 % (€6 k) • All other 0 %.
- Superfan share: 18 % of YT views from subscribers.
- Heat-map: Membership & Physical = “critical leaks.”
